Mines Rescue

Effective Emergency Response – A Critical Component of Every Mine’s Safety Infrastructure
Mine Rescue Makes “Front Page News”
What is Mines Rescue?

Mines rescue is the specialized job of rescuing miners and others who have become trapped or injured in underground mines. Mine rescue teams are specially trained and equipped to deal with a wide range of hazards and situations including combating minefires, explosions, rockfalls, toxic gases, influx of water while rescuing injured workers.
IMRB formed after 10 mine rescuers injured (6 fatally) at the Niwka-Modrejow Mine Poland in 1998.

The follow-up investigation and inquiry found rescuers died from heat stress.

Numerous other contributing factors.

Realized there was a tremendous pool of mine rescue knowledge globally.

Opportunity to learn from one another.
Information Sharing Creates a Safer World
